

Art Curriculum Key Stage 5

Intent:

To develop students' ability to think creatively and critically, to equip them with the knowledge and skills to appreciate, experiment with and create works of art, craft and design.

Both a practical and academic subject, Art embraces the historic, the spiritual and cultural, the critical, the contemporary and the future. The Art curriculum develops visual literacy and perception through engaging tasks which can lead students to a lifelong love of creative pursuits or access to one of the multitude of careers in the Creative Industries. The inclusivity of art can have a transformational power where all children can explore and express their ideas, celebrating curiosity, imagination and ingenuity. We encourage students to actively engage with the subject, promoting personal investigation, independent enquiry, risk-taking and experiential learning. We believe that this leads to a deeper appreciation of the beauty of God's world and contributes to developing a resilient self-confidence, equipping students with the skills to become successful 21st Century global citizens.
